DR. MARITHA SCHOEMAN

Maritha Schoeman is a plant pathologist based at the ARC-TSC in Nelspruit with 35 years' experience on fungal diseases of tropical and subtropical crops that include guava, macadamia, mango, avocado, litchi, papaya and coffee. She specialized in studies on the epidemiology and control of diseases as well as the selection for resistance to fungal pathogens. The ARC-TSC renders a diagnostic service on fungal identifications under her guidance based on her expertise.
