

Speaker

DR. MARK PENTER

Mark Penter has been employed at the ARC-TSC for 27 years as a plant and post-harvest physiologist. He has worked on various subtropical crops including macadamia, litchi, avocado, coffee, mango and pineapple. His research is primarily on the effect of growth regulator and nutrient applications to control plant growth and crop quality. He currently maintains the ARC-TSC macadamia germplasm collection and is engaged in macadamia cultivar evaluation trials.

PRESENTATION DATE & TIME

Tuesday 4 June @ 13h00

PRESENTATION TITLE

ARC – Presentation Macadamia
Cultivar Workstream
