LENA LINDE

Lena Linde has worked for OptiCept for a half a year now, and is originally coming from the horticultural side. Lena is born and raised in Sweden, Scandinavia where she has run her own seed business in vegetable production since she graduated from her Master in Horticulture. Sales, advising and being out in the field with both feet in the ground has always been her cup of tea, that is why the fairly new job at OptiCept was a natural step when she asked for new challenges.
